Introduction

What does it do?

This extension will add a new cache clearing icon to your TYPO3 backend. It is placed inside (at the bottom of) the clear cache menu. When hit, this will update the entire coolURI cache (as known in the coolURI backend module).

I would like to thank Sebastiaan de Jonge and his extension realurl_clearcache which served me very well for this extension!

Screenshots

Users manual

Just install the extension and clear the configuration cache and reload the entire back-end, after that the options should appear automatically for all admin users. If you would like to enable this option for editors as well, you can achieve this by configuring that user or usergroups' User TSconfig. See below.

Configuration

There is a small configuration that can be done to allow editors to clear the cache as well. Simple enter the following in the User TSconfig.

```
options.clearCache.cooluri = 1
```

Known problems

None so far.
